## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 112***

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 2-4 and 14 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. The specification, particularly in reference to figure 2b, does not adequately disclose a housing including a top with a top proximal section and a bottom with a bottom proximal section, the top proximal section having a geometry that facilitates creation of a skin flap with a substantially uniform thickness that includes a skin layer and an adjacent layer of subcutaneous tissue, the bottom proximal section having a geometry that preserves a plane of tissue that is positioned adjacent to the adjacent layer of subcutaneous tissue.

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the

applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 2, 3, 4 and 14 are rejected under 35 U.S.C. 102(e) as being anticipated by Woloszko et al. (US 6896674). In figure 20, Woloszko et al. disclose an electro-surgical apparatus comprising an electrode (803) with a cutting edge, a housing (801) coupled to the electrode including a top with a top proximal section and a bottom with a bottom proximal section, the top proximal section having a geometry that facilitates creation of a skin flap with substantially uniform thickness that includes a skin layer and an adjacent layer of subcutaneous tissue, the bottom proximal section having a geometry that reserves a plane of tissue that is positioned adjacent to the adjacent layer of subcutaneous tissue and a guide (802). **Regarding claim 3**, figure 20 illustrates the housing including a gap between the top proximal section and the bottom proximal section. **Regarding claim 4** Woloszko et al. disclose a chamber (820) that facilitates creation of the skin flap. **Regarding claim 14** Woloszko et al. illustrates an insulator (802) coupled to at least a portion of the electrode.

### ***Response to Arguments***

In response to applicant's argument that the references fail to show certain features of applicant's invention, it is noted that the features upon which applicant relies (i.e., creating a small incision without opening up a large incision or a housing used to determine the depth of flap creation) are not recited in the rejected claim(s). Although the claims are interpreted in light of the specification, limitations from the specification

Art Unit: 3739

are not read into the claims. See *In re Van Geuns*, 988 F.2d 1181, 26 USPQ2d 1057 (Fed. Cir. 1993).

### ***Conclusion***

**THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
